Basel, 22 August 2008

**REDUCTION OF INSECT LANDINGS ON TREATED TEXTILES**  
According to STI-Norm MV-02

**Sample**

1. A: CO/LY (98%/2%) substrate 2.0% Sanitized<sup>®</sup> AM 23-24, LISA-No. 2008-1127-02
2. Control sample, untreated

Sample Ref. No. A <b>Reduction in %</b>	<b>72%</b>	very good effect
Control sample, untreated	<b>0%</b>	

> 70 % very good effect

40-49 % sufficient effect

50-69 % good effect

0-39 % weak - no effect

Treated textiles show, compared to untreated textiles in relation to the number of landings and bites of vectors like mosquitoes, a significant effect.
